206 377	Pink
206 378	Red
206 379	Yellow

- Highly visible
- Lasts up to 3 weeks
- Great to mark stock or as Tail Paint

### PRODUCT INFORMATION

FIL Tell Tail Paint aerosols can be used as tail paint, or as very good general purpose stock markers particularly suitable for cattle (not for use on wool). Colours are fluoro, and are highly visible and will usually last at least three weeks, even in wet weather. So as well as being genuine tail paints for mating identification, they are also ideal for warning marks in the dairy. Another great feature with FIL is that the can empties its full contents, even if used horizontally. One can will do 40-50 average tail marks. Net contents 500ml

Ensure animals are clean and dry before painting. Remove any loose hair. Apply a strip of paint 15cm long by 5cm wide forward along the spine from the tail head. Oestrus activity is indicated by the rubbing, or removal of the paint patch. Tell Tail correctly applied will last approximately 30 days on cows that have not cycled, depending on conditions.
