

# SHOOF FACT SHEET

## CALVING AIDS

### VINK CALVING JACK

The 'Rolls Royce' of Jacks. Comes with either a 1.6m standard pole, or 1.8m long pole. Calf can only be pulled in a tandem movement.

FEATURES	BENEFITS
<ul style="list-style-type: none"> <li>Stainless steel frame and traction assembly</li> </ul>	Has a reliable smooth running traction assembly, requires one simple movement to release and return traction assembly
<ul style="list-style-type: none"> <li>Well designed rump frame</li> </ul>	Keeps the device firmly in place over the hip bones of the cow. This provides a sturdy and fixed base on which the calving jack tilts and pulls, regardless of whether the cow sits, stands or stretches out

### HK CALF PULLER

This range of high quality calf pullers all feature a 1.7m long pole but with different head options.

FEATURES	BENEFITS
<ul style="list-style-type: none"> <li>Break-apart shaft</li> </ul>	For ease of storage or transport
<ul style="list-style-type: none"> <li>HK Traction Device</li> </ul>	Incorporates a quick-release feature for safety of man and animal
<ul style="list-style-type: none"> <li>Tandem or sequential pull</li> </ul>	Choice of either. Sequential can be an advantage as it can help work the shoulders of the calf during a difficult birth, but extreme care should be taken during this type of pull to ensure excessive force is not applied
