

SHOOF FACT SHEET

UDDER SINGE BUTANE WAND

Shoof Code
212 626

FEATURES

- Safely removes udder hair
- Fast and effortless
- Lightweight and mobile
- Universal gas fitting
- Reduces contamination of milk
- Adjustable valve
- Cleaner teat ends

BENEFITS

- Uses the cold lazy 'yellow' flame which won't damage the udder or teat tissue, (the blue flame is the hot flame). This is safe you can run your hand through it without injury
- Only takes 1-2 seconds to burn hair,
- It is easy to operate in the confines of the pit,
- Replacement cans are easily fitted and screwed on
- Removable of excessive hair helps reduce mud, dirty water etc. dripping onto the teat and reaching the milking system and contaminating the milk
- Flame is easily adjusted to maintain an optimum flame, and ensure that maximum efficiency is achieved from keeping burning time to a minimal
- Keeps dirt and manure off teat ends as has nothing for it to stick to, result is it aids in teat hygiene and helps control mastitis, and can reduce somatic cell counts

PRODUCT INFORMATION

Singeing of udder hair has been common practice in the northern hemisphere for decades. Hair houses most of your bacteria, eliminate your hair and you eliminate your bacteria. Hair also provides a platform for mud and manure to accumulate, this environment can be a significant cause of environmental Mastitis. Singeing also helps eliminate ticks and biting bugs like lice, such bugs can cause inflamed udders and mastitis

Note: Unit should be operated in a vertical position, if horizontal the liquid part of the gas is released and the flame is increased to a blow torch. We recommend the wand is held with two hands to ensure you have complete control of the unit and the flame.
