8	213 592	12	213 596		

NB: UK sizing is the standard in Australasia.

There are four great features that separate Bekina boots from all others in the market.

1. Comfort
2. Durability
3. Slip resistance
4. Insulation

Comfort The reason Bekina boots are so comfortable is that they are made from polyurethane, not rubber. Polyurethane is 30% lighter than rubber or PVC. A further feature is that the Steplite-X model was developed especially for the wider-than-standard-European feet of antipodean customers.

Durability Tests have proven that boots made of polyurethane last up to three times longer than rubber or PVC boots (when used in similar circumstances). Our trial-users of Bekina boots reported wear periods of up to 12 months in circumstances where they considered 3-4 months satisfactory from rubber boots.

Slip Resistance Bekina boots comply with the top ISO standard of 'SRC' (Slip Resistancy Coefficient). This standard is achieved by successful testing on ceramic tiles wetted with 0.5% SLS solution and steel with 90% glycerine. This success is due to the inherent grip-ability of polyurethane, and the design of the Bekina treads.

Insulation As polyurethane is a foamed material it contains air bubbles throughout. These act like any foamed insulation material to reduce temperature conductivity. Our Bekina Steplite-X boots will be comfortable in all Australasian farming temperatures and conditions. These same insulation properties also mean Bekina boots do not sweat as rubber boots do, in warm weather.

POLYURETHANE

Polyurethane is a synthetic, foamed material. It is formed from two ingredients which are extruded together with an air bubble structure. This 'foam' structure gives Bekina boots their lightness and insulation properties. Urethane is an extremely hard-wearing material. Boots made from polyurethane last about three times longer than regular rubber or PVC boots.

BEKINA - BELGIUM

Bekina is a family-owned Belgian company, founded in 1962 to hand-manufacture rubber boots. As Bekina developed their manufacturing and marketing, they moved on to pioneering the moulding of polyurethane boots. Now they have 20 years experience in this technique, and sell their boots worldwide. However, their manufacturing is still all done in Belgium, where they exercise tight quality control over all aspects of the process.

AUSTRALASIAN DESIGN

Bekina Steplite-X polyurethane boots were specially developed for Australian and New Zealand users. The 'X' after 'Steplite' denotes 'Extra-wide'. Research by Bekina indicated a special wider boot was needed in this market. Thus the 'Steplite-X' was developed especially. This wider boot is now sold in other international markets.

MONEY-BACK GUARANTEE

If you are using your new Bekina Steplite-X polyurethane boots for a week, and you do not think they are the most comfortable boots you have ever had, take them back to your dealer for a full refund.

LIGHTWEIGHT

Bekina polyurethane boots are up to 30% lighter than equivalent rubber boots.

How ever you get around, you won't do better than buying Bekina.

Chaps Canvas Pull-on

medium 68cm	211 078	\$84.95
large 74cm	211 079	\$84.95
x-large 79cm	211 080	\$84.95
xx-large 85cm	211 081	\$84.95

These comfortable-wearing high-quality leggings are made from 12oz poly-cotton water and mildew resistant ripstop canvas. They feature plastic cam-lock belt straps, and leather ankle straps. Dimension is inside leg. Not chainsaw proof!

Chaps Canvas Side-Opening

medium 68cm	211 082	\$145.00
large 74cm	211 083	\$145.00
x-large 79cm	211 084	\$145.00
xx-large 85cm	211 085	\$145.00

These comfortable-wearing high-quality leggings are made from 12oz poly-cotton water and mildew resistant ripstop canvas. They feature plastic cam-lock belt straps, and leather ankle straps. The side-opening leggings have protective leather panels inside the knees, and full length heavy duty plastic zips on the outside seams. Dimension is inside leg. Not chainsaw proof!
