

## PRODDER DURAPROD....

### New From Hot-Shot

Carrying on from the success of their famous 'Blue' and 'Green' prodders, Hot-Shot of USA have developed an entirely new premium prodder range called DuraProd. These prodders embody all of Hot-Shot's 65-plus years of research and experience to produce the best tools possible with today's latest technologies. DuraProd delivers superior performance, durability and comfort in all conditions. The DuraProd consists of just three replaceable parts: battery/rechargeable power pack, motor unit (handle) and shaft of your choice.

#### CIRCUIT ISOLATION TECHNOLOGY

CIT is a patented circuit design that as near as possible eliminates the possibility of the user receiving accidental shocks, even when working in wet and difficult conditions. CIT is incorporated in all DuraProd prodders.

#### COMPLETELY SEALED CIRCUITRY

The DuraProd motor unit is completely sealed in epoxy, protecting it from any chances of deterioration or damage. The motor unit comprises the whole handle unit excluding the battery pack. Contacts and spark gap are sealed for life.

### DuraProd (battery powered)

with 34cm shaft	210 467	\$299.00
with 59cm shaft	210 468	\$309.00
with 85cm shaft	210 469	\$319.00
handle assy excl shaft	210 470	\$259.00
battery pack cpt only	210 471	\$99.95

The battery-powered DuraProd features state-of-the-art technology, embodied in a superior design prodder. With only four 'C' batteries required, the new unit is lighter and more comfortable to use than any other prodder available.

The DuraProd features an easy-change battery pack which slips directly onto the handle (motor) unit. The DuraProd is supplied complete with four special heavy-duty Hot-Shot 'C' batteries and shaft. All previous model Hot-Shot shafts will fit the new model. If you require a longer shaft (110cm, 130cm) it is best to purchase the handle unit only, and the shaft of your choice.

#### LOW POWER DEMAND

The new DuraProd prodder technology reduces power demand without any reduction in output. Batteries are reduced to four x 'C' cell, and the rechargeable unit lasts longer than previous models.

### DuraProd Rechargeable

with 34cm shaft	210 473	\$469.00
with 59cm shaft	210 475	\$479.00
with 85cm shaft	210 476	\$489.00
cpt handle excl shaft	210 479	\$429.00
extra power pack only	210 480	\$225.00
base unit (nil charger)	210 481	\$139.00
240v charger	205 242	\$59.00
12v vehicle lead	205 241	\$49.95
battery pk (non-rechargeable)	210 471	\$99.95

The Rechargeable DuraProd is the premium prodder available in the world today. This unit features state-of-the-art technology incorporated in the most intelligently designed prodder available. The unit is light and powerful, and will withstand the worst conditions of use. All previous model Hot-Shot shafts will fit the new model. If you require a longer shaft (110cm, 130cm) it is best to purchase the handle unit only, and the shaft of your choice. The NiCad rechargeable power pack is interchangeable with the standard DuraProd battery pack, which can be ideal as a back-up. (Supplied complete with batteries).

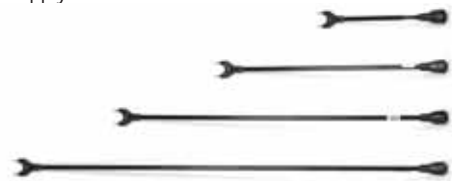

NB: Base unit, charger unit or power lead are not included with the prodder. These must be purchased separately. Both the 240v charger and the 12v vehicle lead from previous 'Green' model Hot-Shot prodders, are compatible with DuraProd.

### DuraProd Recharge Conversion

kit cpt (nil prodder) 210 482 \$315.00

This handy kit can be used to upgrade your battery-powered DuraProd to a rechargeable unit. The kit includes a rechargeable NiCad power pack, base unit, 240v charger and 12v lead. Your DuraProd battery pack can still be used as a back-up power supply.

#### HOT-SHOT PRODDER SHAFTS

Along with the introduction of the new DuraProd range, Hot-Shot are in the process of changing the colour of their flexible polycarbonate shafts from red to black. Please be assured that this is just a colour change. There is no change in the quality or performance of the shafts.

## PRODDER....

### Compact (2800v output)

complete	205 225	\$69.95
repl't battery	205 224	\$21.95

Compact pocket-size prodder. Press button for shock delivery. Loud buzzer sound when shocking. Supplied with alkaline 4.5v battery. Weighs only 150gm. Dimensions 14cm x 8cm.

### Picador (3900v output)

complete	205 229	\$139.00
opt'l ext'n handle	205 228	\$99.95

Picador is quality Swiss-manufactured at a very reasonable price. Operates on two x 'D' batteries (supplied). Length 23 cm o.a. Optional plastic extension handle gives 88cm length o.a., making this a versatile tool for many types of use. **Note:** As required by new animal welfare legislation, these prodders do not shock for more than two seconds without removing from animal.

### Kawe (5000v output)

complete	205 227	\$199.00
opt'l ext'n handle	205 226	\$79.95

Quality German manufacture for long reliable use. Widely used prodder for all types of stock work. Good power. Very reliable. Handy size and shape. Supplied with two x 'D' batteries. Length 23cm. **Note:** As required by new animal welfare legislation, these prodders do not shock for more than two seconds without removing from animal.

#### ANIMAL WELFARE CODE REQUIREMENT

Some species have specific minimum standards for use of electric prodders. Prodders must not be used on deer. Pigs must not be prodded in sensitive areas. Dairy cattle must not be prodded in sensitive areas. In all cases refer to the Biosecurity NZ website <http://www.biosecurity.govt.nz/animal-welfare/codes>
