

MILKING

Tail Trimmer Tailwell®

(drill not incl) 212 915 \$995.00
repl't blade set 213 888 ~~\$199.00~~ \$155.00

Developed in New Zealand this is a remarkable device. It is a simple chuck-attachment for any quality power drill of at least 14 volts, and preferably two speeds (but maximum 1,250 rpm). The front of the device has a fixed circular inner blade over which the outer circular blade oscillates. The cutting action is smooth and fast, taking only 3 or 4 seconds to run up the tail. Even dirty dag-ends feed smoothly over the trimmer. Pre-cutting the tail's switch is not necessary. This is a sturdy, but precision tool, that will withstand considerable use. Gear oil is introduced at the start of use, and after each 50-100 tails, through an external lubrication point provided, and onto the blades. The cutter tension is adjustable. Replacement blade set is available. A neck strap is provided to allow the operator to be hands free between cows. Trimming can easily be accomplished during milking. Full operating and service instructions are included.

Tail Trimmer Apron

212 164 \$125.00

An ideal accessory for the power tail-trimmer is our specially designed apron. This garment incorporates a large bag with rigid plastic hooks which are hung on the pit rail where they can easily be slid along cow-to-cow. (The hooks are suitable for rails up to 50mm diameter.) When the bag needs emptying the wearer simply steps out to the required place and pulls the Velcro bag attachment apart, letting the trimmings fall out. Bag will hold 50-100 tail trimmings.

Tail Trimmer Heiniger Ultimate 3

kit* 211 473 \$1,699.00
belt pouch 212 461 \$79.95
back pouch 212 460 \$129.00
shattle comb 212 799 \$99.95

As a special tool for tail trimming of dairy cows, Heiniger have combined their powerful 12v shearing handpiece with a rechargeable and portable 12v battery pack. The dry-cell battery is carried in either a back pouch or a belt pouch. These pouches must be purchased separately to the kit. The handpiece motor power is 160W. The battery will run the handpiece for about 400 tails. It then requires overnight to recharge. So with two batteries supplied, continuous clipping is possible in large herds. This special tail trimmer uses a 'shattle' comb. This comb has more teeth than a regular shearing comb, making it more suitable for cutting hair. Cut depth is approx 2mm, so the unit is also very useful for TB testing and similar tasks. The Ultimate 3 handpiece weighs 1.55kg. The battery weight is 3kg.

*The Ultimate 3 kit includes: handpiece, 2 x 12v batteries, 2 x battery chargers, shattle comb and Xtreme cutter, all packaged in a heavy duty plastic case. Battery pouch is not included.

NB: Batteries must only be trickle charged.

Scissors Tail Trimming

22cm 205 606 \$16.95

Big ABS plastic handles make these heavy duty scissors more comfortable to use. Stainless steel blades. Serrated blade reduces blade slippage making these scissors ideal for tail cutting and other animal grooming work. Length 22cm o.a.

Mediwipes

160-pack 204 550 \$18.95

These Ethanol alcohol wipes are made of non-woven material. Use for general veterinary disinfection and disinfection of hands during milking or veterinary procedures. Very effective and easy to use. Sealed dispenser pack. More effective and economical than usual isopropyl alcohol and cotton wool treatments. Wipes are 14cm x 21cm.

NB: If wipes container is left open for extended periods, wipes can become contaminated, and cause infections rather than preventing them.

Gestation Calendar Cow

203 182 \$26.95

Even experienced breeders will find this simple rotating chart handy. Just set the inner disc to breeding date, and all other important dates are indicated. These include: return oestrus, pregnancy check, dry off, calving date. Calendar is 22cm square o.a. Waterproof materials.

Can Holder

212 254 \$8.95

Don't let that can roll around the floor. Use our new can holder. Ideal for holding FiL aerosols and applicators. Unbreakable plastic material. Free-draining bottom. Keyhole mounting holes. Will take cans or bottles up to 80mm dia.
