

TEAT SPRAYER....

RJB
213 169 ~~\$109.00~~ \$99.00
The RJB teat spray gun is manufactured in USA. It has a really nice solid feel to it. With only one moving part - the stainless steel valve - this gun is totally reliable. The large-diameter thick-walled stainless steel wand will withstand rough use. There is an internal stainless steel filter to protect valve and nozzle from clogging.

Compact
sprayer 206 735 \$19.95
holster only 204 460 ~~\$24.95~~ \$22.95
Our Compact model hand-held upward-spraying teat sprayer has a short nozzle and capacity of 480ml. The very useful belt holster is available separately, and makes the sprayer particularly convenient.

Tecnomas Wide Neck
500ml 209 854 ~~\$24.95~~ \$17.95
The Tecnomas Wide Neck is the easiest of all teat sprayers to refill, opening to a full 11cm, and having 'snap-turn' closure action. Legs give good stability.

Tecnomas Side Fill
1 litre 209 853 ~~\$24.95~~ \$19.95
The Tecnomas Side Fill has a larger capacity than the Wide Neck, and is filled via a very conveniently placed screw cap. This gives a clear fill opening of 3cm, still considerably more than most regular bottles. The Side Fill sprayer also has 100ml volume graduations etched clearly on the container.

TEAT DIP CUP....

As well as pre-dipping and post-dipping of teats at milking time to reduce mastitis infections, teat dip cups are very useful for treatment of black-pock and other teat lesions.

Non Return
206 695 \$22.95
Dip cup with special non-return feature so sanitising solution does not flow back from the teat chamber to the solution container. Capacity 350ml.

Teat Dip Cup Kruise
206 696 \$16.95
Widely used around the world, the Kruise dip cup from Denmark is simple and convenient. Just squeeze liquid up, and it runs back to the container when released. Capacity 250ml.

Short & Long
short nozzle cpt 207 624 \$13.95
long nozzle cpt 207 619 \$15.95
These are economical and convenient upward-spraying hand-held teat sprayers with a 1ml-per-stroke pump and a large one-litre capacity bottle. Both sprayers feature a stainless steel nozzle tip for extended life. The long-nozzle version is extended 8cm over the short-nozzle version.

Short and Long Viton
short nozzle cpt 207 626 \$21.95
long nozzle cpt 207 621 \$22.95
As with our well known and very economical short and long nozzle teat sprayers, our new Viton models are light and convenient to use. The difference is the chemical resistant Viton rubber valve and seal components. Standard teat spray chemicals quite quickly break down normal rubber seal components, but Viton lasts significantly longer. Although the cost is quite a bit higher, the extra life and consequent reduction of frustration, is well worth the extra cost. Bottle capacity 1 litre.

Dairy Wipes
1,000-pack 201 705 \$99.00
A really BIG bucket of alcohol and chlorhexidine-impregnated non-woven wipes. Ideal for pre-milking disinfection, or for use prior to dry cow antibiotic or other infusion procedure. The bucket has a resealable cap. Each wipe is 20cm x 24cm, a good big size for teats or hands.
NB: If wipes container is left open for extended periods, wipes can become contaminated, and cause infections rather than preventing them.

PRICE REDUCED

"A Veterinary Book for Dairy Farmers"
200 834 ~~\$179.00~~ \$149.00
1999 edition dealing with the full range of cattle ailments grouped broadly according to the age and development of the animal from the young calf to the adult cow. This completely revised and reprinted book is the standard for college courses around the world. Now in full colour, 488 pages.
