

HORSE SHOOF....

Horse Shoof

all sizes (see chart) **\$49.95**

Shoof Size	Hands	Eng. Race Plate	USA Shoe Size	Hoof Width up to	Shoof Order Code
1	up to 12	1	00	110mm(4 1/4")	207 478
2	12-14	2-4	0-2	130mm(5 1/8")	207 479
3	15-16	5-7	3-5	145mm(5 3/4")	207 480
4	over 16	8	6-7	160mm(6 1/4")	207 481

"Shoof" is a shoe-for-a-hoof. This product is used both to protect a hoof from injury, and to assist in the recovery of a hoof after treatment.

Horse Shoof is a low-cost, highly reliable treatment for a wide range of hoof problems, including: seedy toe, stone bruising, excessive wear, splits, cracks, footrot, penetration, abscesses etc. The open design of the Shoof allows the hoof to "breathe", which is essential for fast recovery.

Horse Shoof is supplied as a kit including copper-sulphate (bluestone) medication and a special bandage. These items have been especially developed to ensure successful treatment, even under extremely unfavourable conditions. (eg wet, and dirty paddocks or yards.) Horse Shoof can be re-used many times with our Shoof Refill-Kit components.

Horse Shoof Refill-Kit

each **207 476 \$2.95**

The Horse Shoof Refill-Kit contains the following:
1. Shoof copper-sulphate medication sachet.
2. Shoof special conforming bandage.

These items are highly recommended for successful re-use of your Shoof. They are also convenient and low cost.

Walkease Horse Pad Kit

complete **212 441 \$39.95**
pad only pair **212 440 \$12.95**
glue only **211 648 \$29.95**

Walkease for horses uses the same proven EVA material as Walkease for cattle. Supplied in the kit are two Walkease hoof pads, one Shoof hoof rasp, one tube of Walkease glue and two pairs of gloves. Extra pads and glue are available. Prior to use of the pad, the hoof is attended in the usual fashion. Any repair work required must be completed. The Walkease pad can then be modified if required, to relieve pressure in certain areas. The outer hoof shape should be marked, and the pad cut to size. Glue is applied sparingly to the pad, which is then pressed onto the hoof. Within 10 seconds the glue should 'grab'. The hoof should then be put onto the ground for full weight bearing as soon as possible. The Walkease Horse Pad will last 7-14 days, depending on the activity of the horse. Pads are supplied in one size only, and are 17cm long x 16cm wide. Walkease Horse Pads can also be used for sole protection inside a boot, without glueing in place. This can be useful where continuing access to the sole is required for medication, etc.

Barrier Boot Davis

sz 1 5" (13cm) **200 368 \$59.95**
sz 2 5.5" (14cm) **200 369 \$59.95**
sz 3 6" (15cm) **200 370 \$59.95**

The Barrier Boot is an ideal replacement for a lost shoe. It is also an ideal protector for a tender sole or frog, and allows a horse to walk unshod, protecting the sole from cracks and chips. The pull-on fit is simple and the boot stays secure with the adjustable nylon strap which will not damage the hoof wall. Ideal for use with difficult-to-shoe horses, or unshod horses used for trail riding or other leisure activities. The size dimension above is the maximum heel to toe hoof length to fit.

HOOF RASP....

Stainless Steel

straight **203 623 \$39.95**
curved **203 622 \$39.95**

Straight rasp has coarse and fine cut both sides. Smooth edges. Size 34cm x 3.5cm. Curved rasp has coarse cut one side and fine cut on other. Smooth edges. Size 30cm x 2.5cm.

Carbon Steel

straight **203 617 \$29.95**
curved **203 613 \$29.95**

Straight rasp has two levels of coarse cut on one side and two levels of fine cut on the other. Smooth edges. Curved rasp has coarse cut on one side and fine cut on the other. Smooth edges. Size of both is 31cm long x 3cm wide.

Carbon Steel Heavy

plain **203 615 \$42.95**
handle **203 616 \$49.95**

These rasps are good quality high-carbon steel. Very sharp for heavy-duty use. Plain model has 3 coarse faces and 1 fine, with rasp edges. Size 36cm x 4cm. Handle model has coarse cut one side and fine on other, with rasp edges. Nice plastic handle with useful hanging eye. Blade 36cm x 4cm.

Concave Short **PRICE REDUCED**

203 621 ~~\$29.95~~ only \$24.95

For shaping up the edges of the hoof. Concave blade does not slip off the hoof, skinning your fingers! Blade 11cm long x 4cm wide.

Horse Boot Davis

sz 0 5" (12.5cm) **203 674 \$84.95**
sz 1 5.5" (14cm) **203 675 \$84.95**
sz 2 6" (15cm) **203 676 \$84.95**
sz 3 6.5" (16.5cm) **203 677 \$94.95**

The Davis boot is used primarily for the treatment or soaking of an injured or damaged hoof. The boot opens wide for hoof entry, then closes neatly under the fetlock using the strap and buckle assembly. The size dimension above is the maximum heel to toe hoof length to fit. Larger sizes available on indent-order basis.
