

## TATTOO...

### STONE MANUFACTURING CO., USA

All Stone tattoo equipment is precision made of special aluminium alloy by skilled craftsmen. The tattoo digits can be loaded from the front, and as each is individually located, no blanks are required. Digits cannot be inverted accidentally. The positive ear release prevents points of the digits from scratching or blurring the tattoo mark. All 'outfits' are supplied in a sturdy box complete with set of 0-9 digits and 3oz pot of black ink.

### NOTES FOR TATTOOING

1. Inside of ear should be cleaned of grease and dirt.
2. Try and avoid hair, dark skin, cords or ribs in the ear.
3. Be sure to drive the tattoo digit pins deeply into the ear.
4. Use plenty of ink, especially if bleeding, and rub well in immediately after punching.

The secret is to get the ink well into the pin holes, below the surface of the skin, so that when healed over the ink stain is visible. Green ink is more visible on dark skin.
