

INSTRUMENT SUPPLIES....

OPERATING INSTRUCTIONS AND PARTS LISTINGS

All Instrument Supplies drenchers and vaccinators are supplied with full operating and servicing instructions, and also a gun diagram and parts listing.

Big Gun

30ml pour-on 203 800 \$49.95
 60ml pour-on 203 804 \$54.95

This nice pour-on gun features *no-waste dose adjustment*. Highly visible *Dial-a-dose* indicator window. The barrel incorporates the front valve and applicator nozzle all in one assembly which is easily unscrewed for cleaning or lubrication. The whole assembly is transparent for visibility of product, and any foreign matter. The Big Gun is supplied with 1.3m of large bore 9.5mm i.d. highly-flexible reinforced silicone draw tubing, and also includes an adaptor for smaller 6.4mm i.d. delivery outlets.

Doses: 30ml Big Gun - 3m to 30ml in 1ml increments. 60ml Big Gun - 10ml to 60ml in 2.5ml increments.

Ezi-Squeeze

75ml pour-on 203 864 \$105.00

Latest technology from Instrument Supplies. The Ezi-Squeeze gun incorporates new valve technology to allow faster refill, smoother action and easier squeeze, thus overcoming most of the disadvantages of large-dose applicators. The Ezi-Squeeze also features the IS soft-grip santoprene front handle, a feature which greatly reduces user fatigue, and gives better grip in wet conditions. *Dial-a-dose* indicator window and *no-waste dose adjustment* are incorporated. Ezi-Squeeze is supplied with 1.2m of 9.5mm i.d. draw tubing.

Doses: 7.5ml to 75ml in 2.5ml increments.
Note: Unlike all the other guns on these pages the Ezi-Squeeze is not to scale. Gun is 36cm long o.a.

PRE-LUBRICATED

All Instrument Supplies drenchers and vaccinators are pre-lubed with high quality omega oils which do not oxidise (dry out) during shelf storage.

Drench Container Rigid 4.5L

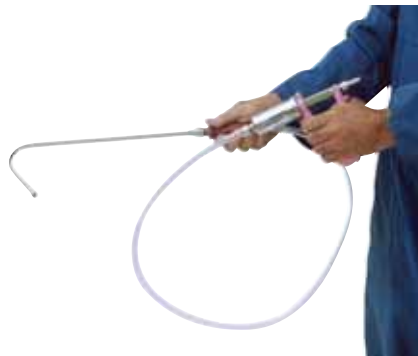

complete 203 855 \$44.95
 Rigid plastic back-pack container, supplied complete with caps and pack straps. Air inlet is through 'breathing' top filler cap. Bottom outlet cap fits both 6.4mm and 9.5mm i.d. draw tube. Capacity 4.5 litres.

Drench Container Flexi 5L

complete 203 848 \$32.95
 repl't cap 6.4mm spigot 203 850 \$5.95
 repl't cap 9.5mm spigot 203 851 \$6.00
 opt'l brass cap (6.4mm) 203 852 \$7.95
 top-draw conv. only 210 668 \$6.95

Collapsing-type back-pack container, complete with pack straps, and safety travel-cap. Draw-off caps for 6.4mm i.d. and 9.5mm i.d. tubes. Also supplied with dropper-tube cap for using container as top-draw for extra safety. Capacity 5 litres.

Drench Hook Floating (for Super-Shot)

short 36cm 203 867 \$81.95
 long 46cm 203 866 \$85.95

Install the floating hook instead of the usual drench nozzle on your Super Shot drencher. This unit is especially useful for drench jobs in races, or crowded pens. A lot safer too. Hold drench gun in one hand and the hook in the other. Good plastic compound grip. No-drip nozzle. Supplied with 1.3m of 9.5mm i.d. silicone draw tube, with wire reinforced ends. Length is overall from front of grip.

Note: The IS Floating Hook will also fit the Henke Drenchmatic drench guns.

Vaximate

1ml vaccinator 203 930 \$20.55
 2ml vaccinator 203 933 \$22.55
 5ml vaccinator 203 938 \$22.95

The original Instrument Supplies vaccinator, tried and true in use world-wide. Whilst looking like a plastic vaccinator, this tool is actually moulded in glass-filled nylon, making it almost indestructible. The operation is smooth and easy, even if the plunger is depressed at unusual and inappropriate angles! The Vaximate valve system has high tolerance for any known remedy. (But please note: copper remedies can still damage the gun if left idle, say over lunch, with remedy in). Vaximate features the Instrument Supplies patented NRG cap (see box). Vaximate is supplied with two 18g x 1/2" st. steel needles and one spare O-ring. (Draw tube not included).

Doses: All Vaximates feature fully variable dose adjustment. Barrels are permanently etched: 1ml in 0.1ml graduations; 2ml in 0.2ml graduations; 5ml in 0.5ml graduations.

V-Vaximate

1ml vaccinator 203 947 \$22.55
 2ml vaccinator 203 948 \$23.95
 5ml vaccinator 203 952 \$26.95
 10ml injector 203 945 \$28.55

The Instrument Supplies V-Vaximate is a development from the original linear-thrust Vaximate. It features a 'V' hinge operation. This geometry generates the same piston pressure, but with smoother and lighter hand action in any position. Another feature of the V-Vaximate is the draw-tube position, exiting internally through the handle V joint. This keeps the draw tube in the most convenient and unobtrusive position for all vaccinating jobs. The V-Vaximate also features the Instrument Supplies patented NRG cap (see box this page). V-Vaximate is supplied with two 18g x 1/2" st. steel needles and one spare O-ring. (Draw tube not included).

Doses: All V-Vaximates feature fully variable dose adjustment. Barrels are permanently etched: 1ml in 0.1ml graduations; 2ml in 0.2ml graduations; 5ml in 0.5ml graduations; 10ml in 1ml graduations.

NRG NEEDLE CAP

A great advance by Instrument Supplies has been the development of the NRG (Needle Release Grip) cap. A most common user injury is needle-stick, caused when trying to remove stuck needles. With NRG the plastic cap pressure is released first. This takes the pressure off the brass Luer-lock mechanism holding the needle. The needle is then easily removed without any user danger, and the plastic cap is tightened ready for attachment of the next needle.
