

DRENCH GUN....

Genia Manual

20ml	202 255	\$119.00
50ml	202 257	\$119.00
70ml	202 258	\$119.00

The manual guns are single-shot. Really useful for those small-number drenching jobs, where you don't want to spend longer cleaning the equipment than you did drenching! No valves or pack to clean. Just suck it up and squirt it out!

Genia Manual

150ml	202 254	\$129.00
250ml	202 256	\$145.00

These extra-large manually refilled drench guns are most useful for large-volume dosing jobs, bloat treatment, obstetric lubricant, etc. Suck volume directly from container, and squeeze the trigger out. No tubes or back-pack to mess around with and clean. No valves to block or lose.

Note: These large-volume drench guns are not suitable for viscous liquids. See our Drench Gun Large Bore for that use.

Genia Large Bore

250ml	202 252	\$179.00
-------	---------	----------

Based on our usual Genia drench guns, this gun has been especially modified for the administration of viscous drench liquids. It is a single-shot 'manual-fill' drench gun, featuring a more powerful suction mechanism, and a large-bore nozzle.

Tubing Genia

202 295	\$27.00
---------	---------

High quality 7mm i.d. x 1.5m long silicone delivery tubing, as supplied with Genia automatic drench guns.

Needle Adaptor Set Genia

207 463	\$29.95
---------	---------

Fits directly into any Genia Drench Gun, or the Genia 300ml Syringe, to convert to injector use.

Blue Plastic (Manual)

70ml	202 246	\$79.95
200ml	202 239	\$84.95
300ml	202 242	\$89.95

Single-dose manual-refill drench guns made from engineering-grade plastics. The hinge action makes them easy to operate. Dose volume is adjusted with the threaded ring. Clear plastic barrel. No valves or tubes to worry about. Just give it a few squirts in soapy warm water to clean.

Blue Plastic Automatic

70ml	202 244	\$119.00
------	---------	----------

Good quality drench gun manufactured in engineering grade plastic and supplied complete with silicone delivery tube. Hinge action ensures smooth and easy operation. Easy dose volume adjustment with large threaded back-ring. Clear barrel. Wash in soapy water.

DRENCH GUN ACCURACY

Please note when choosing a drench gun that dose accuracy of smaller volumes reduces substantially in larger guns. For example, a 70ml drench gun will not give reliable accuracy for doses of less than 30ml, and so on.

Equine Uterine Catheter Stainless

(nil syringe)	202 668	\$115.00
---------------	---------	----------

This 54cm-long stainless steel catheter is ideally used with one of our high-volume drench syringes (as pictured). The catheter has a luer-lock fitting. It will also require a needle adaptor when fitted to a drenching syringe. (Syringe not included.)

Drench Gun Oil Genia

203 181	\$9.95
---------	--------

Genuine Genia quality silicone oil lubricant for Genia (or other) drench guns or auto vaccinators. Contents 7.5ml.

Worming Bit Dark Bay

horse	209 727	\$31.95
-------	---------	---------

Administering tubes of remedy to horses can be a problem. The new Dark Bay Worming Bit is an ideal solution. The required worming paste, mineral supplement or other tube-based remedy is firstly fitted into the plastic bit. The bit is then slipped into the horse's mouth, and the strap placed over the ears where it is pulled up firm. The tube content can then be expelled in a controlled and convenient manner. The paste or remedy is placed correctly on the back of the horse's tongue where it can not be expelled. The Dark Bay bit has a familiar feel for the horse, thus calming the animal. A special adaptor part is included in the bit pack for the purpose of fitting various sizes of paste syringes to make the Dark Bay bit truly universal.

Pole Syringe Westergun Mini

complete	210 682	\$245.00
repl't syringe	212 825	\$22.95

The Westergun Mini is easily handled by one person to administer injections on foot or from a moving vehicle. All injections become convenient and practical as the operator is kept at a safe distance. Incorporated in the Westergun Mini is dual-purpose automatic needle projection, with built-in cotton wool and spirits holder for disinfectant action between injections. The pole is manufactured of lightweight aluminium and utilises a reusable nylon 10ml syringe with a 14g x 1" needle. The syringe contents cannot be released until the needle is inserted to its maximum depth. Pole is telescopic. Length closed 84cm. Length open 130cm.
