Drench Bottle Easy Drencher

complete	213 553	\$22.95	\$19.95
probe only	202 227		\$9.95

Warning. If you still use an old wine bottle for drenching cows for bloat etc, you'd better watch out for the OSH man! Glass bottles are dangerous to both man and beast. Easy Drencher is the answer. Developed by New Zealand dairy farmer Kevin Bills. A purpose-designed all-plastic bottle for safe and easy administration of volume drenches.

Easy Drencher features:- easy-grip handle, 1.2 litre capacity marked in 100ml levels, 12cm long safe plastic probe, wide 63mm neck opening for ease of filling with dry or liquid remedies.

Note: Even though this device has been designed with safety in mind, care must still be taken to allow the animal to adequately swallow during drenching. Drowning can occur. Administer in the side of mouth for correct probe placement.

New

Big Drencher 2.5 litre

complete	213 701		\$29.95
repl't probe only	213 672		\$9.95

The Big Drencher uses our standard Easy Feeder calf feeding bottle with our new 'Big Drencher' probe. This probe is ideal for 'volume' drenching of mature cattle. The wide 70mm-dia neck makes for easy filling of drench products. The good hand-grip ensures the bottle is easy to handle in a drenching situation. For users who already own a Speedy Feeder or Easy Feeder (calf feeder bottle), the Big Drencher probe on its own will fit right on.

New

Drench Bottle Brown Rubber

each	213 645		\$12.95
------	---------	--	---------

If you are used to doing your drenching with a wine bottle, but are worried about the very real OHS risks, then here is the answer. A rubber wine bottle! No risk. Squeeze to empty quickly. Low cost. Capacity 750ml.

Syringe Genia Nylon

300ml	206 303		\$94.95
450ml	206 306		\$129.00

Huge easy-to-squeeze nylon syringes. Use as a one-shot drench gun for bloat, glycerine, obstetric lubricant etc. Got to be useful. Supplied with Genia long nozzle. Alternative nozzles available including hook nozzle (see Genia these pages). Also valuable as an intra-rumen bloat injector with our Needle Adaptor and Intra-Rumen Needle.

Syringe Europlex Plexiglass

400ml	206 298		\$139.00
-------	---------	--	----------

Made of tough, long-lasting plexiglass. This syringe can be boiled to sterilise if required. Supplied complete with 22cm long drench nozzle. Useful for bloat drenching, obstetric lubricant, etc.

Henke Vet-matic

5ml	207 001		\$169.00
10ml	207 000		\$229.00

All metal high-quality German-manufactured Henke Vet-matic auto vaccinator at a good price. Note these features:- 5ml or 10ml, permanently etched glass barrels for dose accuracy, comfort grip with delivery into back handle to clear animal, finely accurate dose adjustment, resistant to all vaccines and injectables, all parts available. Ideal for BVT and leptos. vaccinations. The Vet-matic vaccinator is supplied with silicone delivery tubing, air-entry ascending tube (for bottle use) and full parts list and diagram.

Go to www.shoof.co.nz for parts list

Vaccinator complete with standard bottle No. 1 adaptor.

optional adaptor No. 2

Henke Ferro-matic 5ml

complete	206 988		\$239.00
adaptor No. 2	206 989		\$89.95

The Ferro-matic vaccinator is manufactured by Henke-Sass Wolfe of Germany. This company is known around the world for its manufacture of high quality medical and veterinary equipment. The Ferro-matic is especially for use attached directly to the vial or remedy bottle, in packs up to 100ml.* An air inlet system is incorporated to prevent vacuuming of the bottle. If remedy is in a pillow-pack (collapsing) bottle, where air admission is not desired, the optional No. 2 adaptor should be used.

* Using Henke No.1 adaptor.
