Syringe Genia Plexiglass

300ml	206 304	\$249.00	\$199.00
-------	---------	---------------------	----------

The Genia Plexiglass is our best quality volume syringe, made in France. This syringe features metal top and bottom caps making it most robust for heavy-duty use. This is especially so for the bottom cap which supports the nozzle. The plunger shaft and washer is also made of metal, so will not distort under any sterilisation. This is a life-time tool. Brass nozzle is 19cm long. A spare seal is included.

Needle Intra-Rumen

18cm	204 755	\$49.95
------	---------	---------

Special needle for direct injection through the hide into the rumen of cattle. Can be used either fitted to a length of 4mm i.d. tubing, or direct-connected to any Luer syringe. (See Dairy section for instructions for use with bloat remedy.) Length 16cm x 4mm o.d.

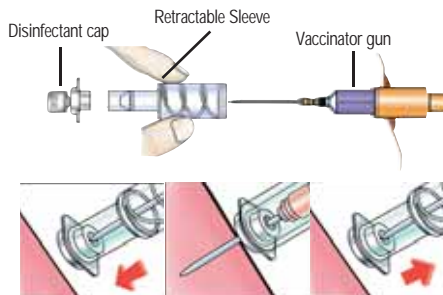

Syringes HSW Soft-Ject

3ml 100-pack	207 598	\$23.00
5ml 100-pack	207 600	\$35.00
10ml 100-pack	207 593	\$49.00
20ml 100-pack	207 596	\$73.00
30ml* each	206 277	\$2.55
60ml* each	206 281	\$2.95

Soft-Ject are high quality syringes manufactured in Germany by HSW (Henke-Sass Wolf). These are a 3-part syringe with rubber-seal plunger. Luer-slip. Sizes 5ml and larger are eccentric tip. We particularly recommend these nicely made smooth-functioning syringes which do not suddenly pop-open, if opened too wide!

*Syringes are not Soft-Ject brand.

Sterimatic Needle Disinfectant

starter kit cpt	210 277	\$69.95
Stericaps 5-pk	210 279	\$42.95

Sterimatic is a UK-invented and patented system that prevents needle-stick injuries during vaccination jobs and reduces injection-site infections and abscesses. The system also reduces the potential of disease transmission from one animal to another. The Sterimatic system comprises a retractable sleeve which is fitted over the vaccinator needle and a disinfectant-impregnated quick-change Stericap which is placed on the end of the sleeve. The sleeve covers the needle completely, preventing accidental needle-stick injuries to the user. Each time the vaccinator is used, the Sterimatic sleeve slides back drawing the Stericap over the needle. In this way, the needle is sanitised each time it is used. A new stericap should be fitted after 100 injections. Sterimatic will fit all popular models of vaccinator. The Sterimatic Kit comprises one sleeve assembly plus five stericaps and five needles. The needles are 1" x 18g (although in the Sterimatic the needle is effectively 1/2"). The Stericaps 5-pack comprises five disinfectant caps plus five needles.
