

Lambing Aid String Snare

204 217 \$17.95

Useful tool for assisting lambing, calving hinds, or other small animal births. Snare can be put over head or leg, pulled tight, then lamb pulled gently out. A simple trouble-free device. Plastic and nylon for long life with no maintenance. Length 37cm o.a.

Bearing Retainer Ewe

4-pack cpt 200 390 \$12.95

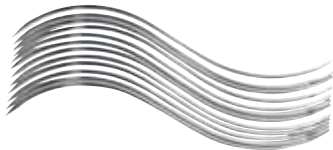

This support is used to help prevent prolapse before or after lambing. Once inserted into the vagina it can be tied to the fleece to retain. Or use a piece of old baling twine, to secure in place with a loop around the front legs (under neck) and back to the retainer. Even when used prior to birthing, the exit of the lamb will push the retainer clear. Sterilise and use a lubricant before insertion. Pack of 4 supports complete with tie tapes.

Lambing Twin Straps

10-pack 204 219 \$32.95

Developed in Southland to solve the problem of twin lambs becoming estranged or orphaned. Simple leather loops are hitched around a front leg of each lamb (please allow them to both go the same direction). Remove after two or three days. Lambs can feed and play easily whilst strapped together. Packet of 10 straps.

Vaginal Suture Needles

13cm 12-pack 207 631 \$49.95

Big, sharp, double-curved suture needles ideal for use with our umbilical or vaginal tapes (see this page). Needle eye is 6mm long x 1.4mm wide. Needles are 13cm (5") long. Supplied in 12-pack only.

Obstetric Lubricant

1 litre 204 889 \$11.95

Quality Cetrimide-based lubricant especially packed in a small one-litre jerry can, ideal for carrying in coat pocket, bike or ute. Also available 2 litre and 5 litre packs and as power mix. (see index).

Umbilical Tape Jorvet

18m 206 965 ~~\$26.95~~ \$24.95

For tying-off the umbilicus, or suturing vaginal prolapse. The Jorvet tape is braided polyester, 3mm wide x 18m long, easily extracted from the resealable plastic pottle. This is the finest of our vaginal tapes selection and also the most economical.

PRICE
REDUCED

Vaginal Tape Bovivet Ewe

5m 207 030 ~~\$22.95~~ \$19.95

For suturing the vulva to treat vaginal prolapse. Procedure causes little trauma for fast recovery. Easy-to-use transparent tape dispenser. Tape 4mm wide x 5m long.

Lamb Reviver Roslam

complete 204 213 \$25.95
tube only 204 215 \$21.95

Roslam is the original lamb reviver, invented by Derek Watson of Invercargill in the 1960's used and trusted in New Zealand since. The Roslam reviver is extremely safe to use, feeding colostrum, electrolytes or artificial supplements direct to the stomach. The gravity delivery of Roslam is safer than other pressurised delivery methods or bottle feeding of non-sucking lambs, almost eliminating the risk of drowning. Another feature is the special soft stomach tube, which does not get stiff in cold weather, and thus does not cause damage to sensitive tissue in the young lamb's throat and stomach. Open ended bottle capacity 120ml, marked in 30ml graduations. Feeding tube is 42cm long.

PRICE
REDUCED

Vaginal Tape Genia Ewe

5m 207 032 ~~\$26.95~~ \$24.95

For suturing the vulva to treat prolapse. Procedure causes little trauma for fast recovery. Full instructions with tape. Easy-to-use transparent tape dispenser. Tape 4mm wide x 5m long.

Fawn Reviver Roslam

complete 202 835 \$59.95
tube only 202 836 \$44.95

Based on the famous Roslam reviver, the Fawn Feeder uses the same "bottle" but a different stomach tube suitable for fawns and other small animals such as puppies etc. Bottle capacity 120ml in 30ml graduations. Feeding tube is 70cm long x 7mm dia. Incorrect use could be dangerous for your animal. Consult a veterinarian.

Vaginal Tape Needle

20cm economy 207 034 \$19.95
20cm quality 207 035 \$49.95

Specially made vaginal suture needles suitable for ewe prolapse suture, using tapes as above. We recommend the Aesculap and quality versions. Use with care. Discuss procedure with your veterinarian.

Vaginal Prolapse Pin Ewe

5-pack 209 879 \$7.95

Specially made stainless steel pins for closure of vulva after vaginal prolapse replacement. This method can be quicker and easier than usual suture methods. Pin is 7.5cm o.a. with 4cm clear shank. Thoroughly wash and disinfect the vulva area, and the pin, before use. Consult a veterinarian for advice.
