

Lamb Feeder Excal Topper

each 207 505 \$2.95

25-pack outer \$2.65 each

The Excal Topper is the most versatile lamb and kid feeding device available. Using the proven Excal lamb teat in our 'Topper' cap. This nice solid cap incorporates a ball valve to allow inlet of air. The Topper will fit all standard 28mm o.d. thread plastic 'coke' and soda bottles. The Excal Topper is a long-lasting teat, that will rear quite a few lambs without breaking up. And lambs love it. If you wish to speed up the flow for stronger lambs, just extend the tip x-cuts slightly.

Lamb Feeder Non-vac

complete 204 197 ~~\$16.95~~ \$13.95

repl't teat only 204 198 ~~\$4.55~~ \$3.95

Baby-quality strong and clear polycarbonate bottle cleans and sterilizes properly, unlike standard polypropylene bottles. Also the clarity makes for easy visibility of milk level and flow. Like babies bottles, the teat can be inverted with special screw-down cap to seal-off milk. Great for transporting full bottles. Soft latex teat with hollow-cone tip. Concealed non-leak air inlet prevents bottle vacuum. Bottle is 500ml capacity, marked in 50ml graduations.

Teat Intake Elbow & Valve Excal

10-pack 211 403 \$9.95

The Excal teat intake elbow incorporates a valve to prevent 'blow-back' of milk. This feature makes suckling easier especially for new or weaker calves or lambs. The Excal intake will fit directly into the back of all Excal lamb or calf teats. Another benefit is the teat being enabled to draw milk from the very bottom of the bucket or feeder. Diameter 10mm.

Teat Lamb/Kid Excal Little Softy

each 211 672 \$3.25

25-pack outer \$2.95 each

Our 'Little Softy' lamb/kid teat has been designed especially for use in our gravity lamb feeders. The Little Softy features the same inverted-tip design as our famous 'Big Softy' calf teat, that is, fast-flow for hungry animals, and a non-leak quality. The Little Softy teat will fit straight into any feeders using standard New Zealand-manufactured pull-through calf teats. This enables any of these type calf feeders to be easily converted to lamb or kid feeding. Or if you wish to create your own feeder, drill 22mm holes in any suitable container.

NB: The 'Little Softy' is a very soft 'starter' teat. It will not stand up to heavy use by older lambs and kids. Teats should be changed to the 'Regular' lamb/kid teat at that stage.

Teat Lamb/Kid Excal Regular

each 209 985 \$3.25

25-pack outer \$2.95 each

Our 'Regular' lamb/kid teat is designed to replace our Little Softy (white) lamb/kid teat as the animals get stronger and start chewing the teats. This black teat is made of stronger, harder rubber that is longer lasting than the Little Softy teat. But the disadvantage is that this regular teat can be too firm for starting very young lambs and kids.

Teat Lamb/Kid Excal Universal

each 206 710 \$4.45

25-pack outer \$4.00 each

The Universal lamb/kid teat can be used on a variety of bottles, or on 'calfeteria' type feeders with 11mm o.d. tube delivery. For fitting to bottles with necks from 25mm to 35mm diameter, the outer 'skirt' should be pulled upwards and the teat plugged into the bottle and the skirt folded down. (If the bottle has no other air inlet, a staple or piece of string - see diagram below - can be used to allow air entry.)

Note: For all feeders the teat slit must be in a vertical plane. To increase flow for bottle feeding, the teat can be cut in an X.

LAMBS, KIDS AND TEATS

If a lamb or kid has been partially reared on a particular teat, and then is offered its milk through an alternative-type teat, it is very normal for the animal to firmly reject the new-type teat. This does not mean that the new-type teat is unsatisfactory - only that these young animals can be fiercely resistant to change.

SHOOF TEAT DESCRIPTIONS

'Lamb' - small and soft, ideal for new lambs or kids. Might not last too long with strong lambs or kids.

'Lamb/Kid' - larger and stronger teat, ideal for stronger lambs and kids which may give it a hard time.

Teat Lamb/Kid Soda Bottle

206 711 \$4.95

Very handy teat which fits on any standard cola or soda bottle. Cut an X in teat end with razor, or melt a hole with a hot nail. (No hole supplied!) Very long lasting red rubber.

Teat Lamb Latex

natural 206 716 \$2.95

black 206 715 \$2.95

These latex teats are 'baby' quality in two grades of softness. The 'natural' is very soft, ideal as a starter teat for lambs. The 'black' is slightly firmer, but will last longer. hollow-cone tip to be cut off at desired milk flow rate. Teats pull easily over normal 28mm neck soft drink bottles.

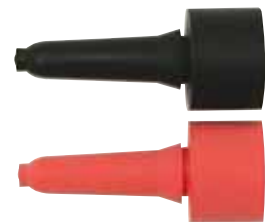

Note: These teats, as supplied, do not have an air inlet hole.

Teat Lamb Latex

each 208 906 \$1.95

Very good quality natural latex rubber lamb teat. Ideal for new born or very small lambs. Fits bottles with 25mm o.d. neck size. No air inlet on teat.

Teat Lamb/Kid Lambar

cross-cut (black) 204 196 \$2.35

hole (pink) 211 914 \$2.35

25-pack outer \$2.10 each

Well known lamb and kid feeding teat, which can be used in a 'calfeteria' type feeder. The teat can be fitted through a 14mm hole and will take 11mm o.d. calfeteria-type delivery tubing in the back. Or it can be stretched over a 'pop' bottle as a bottle feeder (but needs an air-inlet in this configuration). Cross-cut or round-hole tip. Hole teat is softer.
