Leg Splint BOS Cow

small 47cm (blue)	210 354	\$74.95
large 51cm (orange)	210 353	\$74.95
x-large 56cm (lilac)	210 355	\$85.00
repl't bandage	211 533	\$9.95

This valuable product was developed in New Zealand by veterinarian Guy Oakley. It is used in cases of calving paralysis which commonly cause knuckling-under of one, or sometimes both hind legs. The BOS splint is simply applied to the back of the leg using the special adhesive elastic bandage included in the kit. The splint bottom should be at ground level. Generally application of the BOS splint will allow the animal normal mobility almost immediately after application. The small splint is suitable for Jersey or smaller Friesian cows, and the large splint for larger Friesian or Holstein cows and the x-large for very large Holstein. Leave the splint in place from 4-7 days, depending on the severity of the condition. In all cases the splint can be moulded somewhat to the individually required shape by use of a heat gun or hair dryer. The BOS splint can be reused with a new bandage. Dimension length o.a. Consult your veterinarian for further advice.

NB: Administration of anti-inflammatories at initial splint application may also be beneficial. Consult your veterinarian.

Leg Splint Ozland Calf

single	204 331	\$59.95
pair	213 674	\$109.00

These reusable ABS splints have been designed primarily for correcting flexed pastern (knuckle under) of the calf. They are usually required as a pair due to the knuckling of both front feet but we do supply as a single splint if required. The splints come with internal padding and are applied close to ground level to straighten out the pastern joint. The three Velcro straps secure them to the legs. Splints can be washed and reused. Leave in place for two to four weeks, or until the condition is cured. Splints are 22cm long, and weigh only 70gm each.

Calf Cover Shoof

standard size	210 716	\$22.95
larger size	211 248	\$22.95

These water resistant calf covers, are high quality cost-effective protection for young calves. Made from a polyester-based product with rip-stop and weatherproof properties. This material does not flap in the wind like plastic covers do, thus keeps the calf warmer and calmer. Ideal for calf-club calves and to protect smaller calves released outdoors before weaning. Standard size 80cm long x 40cm deep, suit calves 40-80kg. Larger size 90cm long x 45cm deep, suit calves 60-100kg.

Emergency Thermal Blanket

135cm x 190cm	202 534	\$4.95
---------------	---------	--------

This double sided metallic foil blanket is excellent for aiding in body temperature recovery in cases of hypothermia and animals suffering from shock. It reflects back up to 80% of the patient's body heat thereby reducing temperature loss.

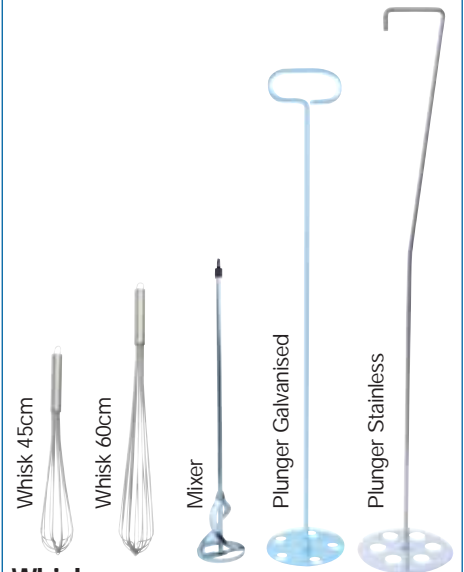

Leg Splint BOS Calf

front leg (yellow)	210 350	\$69.95
hind leg (green)	210 352	\$64.95
repl't bandage	211 533	\$9.95

When a calf is born with a contracted flexor tendon, the fetlock joint is caused to knuckle under, causing serious limitation to the mobility of the calf. The BOS splint is applied to the back of the leg, with the splint bottom edge at ground level. With application of the splint the calf should have normal mobility immediately. Remove the splint after 4-5 days. Splint length 40cm o.a.

NB: The BOS splint can be slightly modified to suit the leg by use of a hot air gun. Be sure to note 'TOP' marking on splint.

MILK POWDER....

Whisk

45cm o.a.	204 612	\$39.95
60cm o.a.	204 613	\$47.95

You know they work well for whipping cream, so here is a jumbo version for mixing milk powder. Made of stainless steel. Fastest cleanest method yet for mixing smaller quantities of powdered milk. Dimension is length o.a.

Mixer
