

### Teat Calf Excal Big Softy (Black)

each 213 696 \$3.95  
25-pack outer \$3.75 each

The Big Softy makes all the other 'gravity' calf teats obsolete. With gravity feeders, (where the milk level is higher than the teat), two issues arise. First is preventing leakage through the teat, and second is whilst preventing leakage still enabling the calf to suckle freely. The Big Softy achieves both these ends. The tip design does not leak, even after substantial use, and yet the tip opens freely as soon as the calf begins suckling. The Big Softy will fit all feeders with standard 22mm (+/-1mm) teat holes. It is equally suitable for hand-held bottle feeding, or for top-teat tube delivery feeders. Big Softy is protected by New Zealand Design No 405207.

### Teat Calf Big Softy Screw-cap Fit

211 363 \$3.95

This variation on our regular Big Softy teat is for use with 54mm id screw-cap teat-mount fittings.

NB: When mounting, slit should be vertical, with longer teat-part upper most.

### Teat Calfeteria Black Rubber

each 206 687 \$1.95  
25-pack outer \$1.75 each

This calf teat has been marketed in Australia for many years. It is generally fitted into a 22mm diameter drilled hole in any plastic or metal container. The teat extends 38mm from the container surface. For delivery tubing use our 15mm o.d. tube 209 237.

Cut-away teat showing internal pump-chamber.

### Teat Calf Excal Fast-flow

each 206 680 \$3.65  
25-pack outer \$3.25 each

The Excal Fast-flow tube-delivery teat was the fore-runner of all modern calfeteria teats for group feeding of large numbers of calves. The internal shape creates a pump-like effect as the calf bites it. The first biting action closes the base end of the teat, and further mouth closure forces milk out through the tip. Almost the same effects as when the calf is suckling naturally. The Fast-flow calf teat takes standard 11mm o.d. plastic tubing, and should be mounted at the most ideal suckling height for the calves being reared, with the delivery tubing descending into the milk container. Excal non-return valves should be used at the bottom of the milk tubes to prevent back-flow. The Excal Fast-flow teat is fitted into a 22mm diameter drilled hole, in any plastic or metal container or remote feeding panel.

### Calf Feeder Excal

complete 207 391 \$14.95  
teat/cap kit\* 207 394 \$7.95

Used in New Zealand for many years, the Excal calf feeder features the well-proven Excal Fast-flow teat, with non-return valve in the back to help weak or new-born calves start suckling. The air valve can be covered with finger or thumb if suckling is too fast. A good nursing bottle at a great price.

\*Kit includes air-inlet valve.

### Teat Calf Soda Bottle

206 686 \$5.95

Those of you who are old enough may remember feeding calves with an inflation on a beer bottle. Nowadays a beer bottle only feeds a piglet, so we found these nice new soft teats, for calves or lambs and kids, made to fit onto your standard soda bottle. Squeeze the bottle for speedy drinkers Cut an X in teat end with razor or knife, or melt hole with hot nail (no hole supplied!)

### Calf Feeder Tube Stop Valve

10-pack 207 411 \$9.95

The Excal tube and teat stop-valve is a one-piece plastic moulding with a stainless steel ball. The valve stem is 7.7mm o.d., suitable for plastic tube with i.d. from about 6mm to 7mm. Valve length 23mm o.a. Diameter 13mm at maximum. The stop valve can assist the calf suckling.

### Teat Intake Elbow & Valve Excal

10-pack 211 403 \$9.95

The Excal teat intake elbow incorporates a valve to prevent 'blow-back' of milk. This feature makes suckling easier especially for new or weaker calves or lambs. The Excal intake will fit directly into the back of all Excal lamb or calf teats. Another benefit is the teat being enabled to draw milk from the very bottom of the bucket or feeder.

### Teat Intake Elbow Milkflow

plain 10-pk 211 055 \$7.95  
w. valve 10-pk 210 599 \$17.50

The Milkflow teat intake elbow is used to enable a 'gravity' teat to empty all the milk from the bottom of a feeding container. The elbow fits neatly and firmly into the back of the Big Softy teat. The internal dimension will take the tube-end of an Excal Stop Valve to further enhance its versatility. Dimensions are 10.25mm o.d., 7.35mm i.d., length 45mm o.a., enabling suction to a depth of 35mm from the centre of the teat. Sold in 10-packs only.

### Calf Bucket Floating Dummy

complete 213 671 \$19.95  
repl't teat 213 704 \$9.95

Using our floating dummy is the easy way to teach a calf to drink from a bucket. Large and stable float, with one-way suckling valve.
