Clipper Lightweight

13cm 211 968 ~~\$14.95~~ \$12.95

These small nail clippers are very light to handle and feature moulded 'soft-grip' rubber handles for an accurate and easy grip. Length 13.5cm o.a.

Scissors

7.5cm 202 156 \$22.95

Good quality stainless steel from Kruuse of Denmark. Use for cats and small dogs, where other dog nail clippers are too large. Length 7.5cm o.a.

Scissors

11cm 202 155 \$19.95

Good quality stainless steel clipper from Kruuse of Denmark. Length 11cm o.a.

Clipper

17cm standard 202 147 \$27.95
 17cm quality 202 146 \$47.95

Quality stainless steel blades. Easy action thumb lock. The high quality curved cutting edges on these ensure nail is cut, rather than crushed. Quality version is from Germany. Both 17cm o.a.

Guillotine

Resco 7.7mm 202 152 \$36.95
 Resco 9.3mm 202 153 \$39.95

Guillotine-action clippers generally give a quicker and cleaner cut than standard type clippers. They can also be easier to use on a moving pet paw due to the full-circle nature of the cutter. Resco clippers are supplied in a box with instructions for use, and are generally regarded as good quality. The dimension is the guillotine opening diameter.

THERMOMETERS....

Infra-red

212 773 \$149.00

Taking the temperature of any surface can now be a non-contact process. Just aim this instrument at the required surface, press the trigger and current temperature will be displayed. Particularly ideal for hot, hazardous or hard-to-reach objects, up to 2m distant. This thermometer can be used to determine temperature of animals or reptiles, and further to determine an actual area on the animal that has extra heat in it. Read temperature in °C or °F. Range -32°C to 300°C. Auto power-off. Powered by 9v battery.

Digital Large Animal

212 772 \$22.95

This longer than normal veterinary-type probe-thermometer is ideal for use on large animals. The probe is 12cm long, and the whole unit is robust and waterproof. A protective probe cover is supplied. Range 32°C to 42°C.

Stethoscope Technician Model

205 895 \$22.95

Economical stethoscope of reasonable quality for non-professional use. Can be very useful during calving or lambing to verify heartbeat.

Stethoscope Panascope

standard 205 890 \$79.00

This stethoscope features the dual type head system with rotating airway. Low cost instrument of reasonable quality for everyday use. The standard model has good sound definition.

Capillary Veterinary

206 806 ~~\$9.25~~ \$7.95

Conventional mercury rectal thermometer, supplied in a sturdy plastic case. This thermometer is of a good size to hold, and has large easy-to-read temperature numbers reading 36°C to 43°C. Length 12cm o.a. Supplied in sturdy plastic case.

Digital Veterinary

thermometer 206 818 \$19.95

Four times faster than ordinary glass thermometers. 'Beep' signals when to read temperature. No twisting or squinting to read. Display retains temperature reading. Range 32°C to 44°C. Length 12cm o.a. Supplied in plastic case. (This thermometer is not waterproof).

Capillary Small Animal

206 808 \$3.95

This small capillary thermometer is especially suitable for small animal rectal use, due to its very thin 3.6mm tip. But we recommend care if used on larger animals, as it can easily be lost or dropped. Range 35°C to 42°C (some practise can be required to read easily). Supplied in plastic holder.

NORMAL TEMPERATURES

Following are normal temperatures for animals in degrees centigrade:

Cat	38.0 - 38.5	Deer	39.0 - 40.0
Dog	38.2 - 38.7	Pig	38.2 - 40.5
Sheep	38.4 - 41.0	Cow	38.6 - 39.0
