

CALF FEEDER....

The M1 is a convenient and versatile feeder for either wall mounting or for rail hanging, and when empty can be 'nested' for easy carrying and storage space. A big feature of this feeder is Shoof's no-leaks Big Softy teat and teat intake valve. The small teat-well at the bottom leaves almost no waste milk. Made of UV-stabilised polypropylene. Five litre capacity.

M1 Wall-Mount

complete	212 219	\$39.95
extra bracket	209 416	\$7.95

The galvanized wall bracket is screwed onto a wall or rail. The M1 simply hooks onto the bracket for a secure mounting, resistant to bumping or rough use.

M1 Rail-Hang

complete	212 221	\$39.95
repl't hook ea	210 429	\$5.95

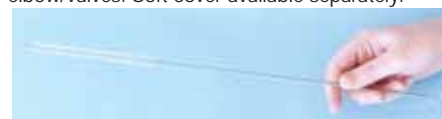

The rail-hanging M1 is easiest to use. The strong plastic rail-hooks have grip teeth and high tensile strength to firmly grip any rail, wood or pipe, up to 38mm (1½") thick. Rail hook can also be used to convert wall-mount M1 to rail-mount.

Rail Bucket 6-Place

cpt (excl cover)	207 401	\$89.95
cover only	213 362	\$34.95

The 20-litre Excal Rail Bucket is a 6-place calfeteria-type feeder. Simply hang on any convenient rail, up to 32mm (1.25") thick. The teats are Shoof 'Big Softy', fast flow and no leaks complete with intake elbow/valves. Soft cover available separately.

Tubes Brush

40cm long	200 990	\$5.95
60cm long	200 991	\$7.50

Ideal brushes for cleaning calfeteria tubes. Available 40cm or 60cm long, both 6mm diameter nylon bristles on a twisted steel wire shaft.

NEW 4-litre Speedy Feeder*

New

Easy Feeder (1-speed)

complete	207 386	\$19.95
teat/cap assy	207 389	\$9.95
repl't teat only	202 436	\$7.55

Speedy Feeder (3-speed)

2.5L complete	207 404	\$29.95
*4L complete	213 731	\$39.95
teat/cap assy	207 407	\$9.95
repl't teat only	202 436	\$7.55

Easy Feeder and Speedy Feeder are made by Shoof. Easy Feeder is a single-speed nursing bottle and the Speedy Feeder is three-speed. With Speedy Feeder when you get a real fast sucker, switch to 'Fast' and let him go for it. When you have a weak premature-born calf, needing careful feeding, switch to 'Stop' or 'Slow' and let him take milk as he can cope without drowning. The three speeds control the air inflow to the bottle, and thus the milk outflow. Reduce time wasted on speedsters and prevent drowning weaklings, all using the same bottle and teat.

These feeders also feature intelligently designed bottle with multi-directional easy-grip hand hold. The teat is mounted low in the cap to empty the bottle contents completely. The wide 70mm-diameter neck ensures easier filling and cleaning, and the coarse-thread cap is quick and easy to fit. The wide base gives the bottle maximum stability when standing. Spare teats are supplied as fitted teat/cap assemblies, green cap for Easy Feeder and blue cap for Speedy Feeder, or as bare teat. (Teat replacement needs some strength to achieve.)

Milk Train (2-place)

complete	212 216	\$52.95
----------	---------	---------

The Milk Train is modular. Stack them together - with the teats on. Join them together with the dovetail ends - as long as you want. Easy to carry about with the central handle. Supplied standard with Excal Big Softy teats and intake elbow/valves. Ten litres total capacity, with individual compartments of four litres. Hooks suitable for timber or pipe rails up to 38mm dia. The Milk Train is a revolution in portable calf feeders. Each Milk Train is 42cm long.

New

Anti-Suckling

liquid only	200 208	\$29.95
sprayer only	200 209	\$7.95

This liquid is actually produced for the pig industry as an anti-fight liquid to reduce tail biting by piglets. But it is valuable also for calf rearers to reduce navel suckling. Suckling of navels by calves is reputed to increase incidence of mastitis when calves mature. The Pig Pax liquid is sprayed onto navels of other calves, and then, for added effectiveness, a little can be sprayed into the mouth of the persistent suckler calf. Contents 500ml. Sprayer supplied separately.
