## Hay Net Nylon

size 1	203 533	\$11.75
size 2	203 534	\$14.95
size 3	203 535	\$16.95

Nylon mesh net contains hay whilst allowing animals to remove it through mesh. Useful for penned or confined stock, or for shows, field days, events, etc. Smaller mesh suits younger stock.  
 Size 1: small net, 50cm deep, with 9cm mesh  
 Size 2: med net, 80cm deep, with 9cm mesh  
 Size 3: large net, 90cm deep, with 14cm mesh

## Hay Bag Nylon

212 455 \$39.95

The nice thing about using our hay bag, instead of a hay net, is that there is no mess left in your vehicle. Also hay is kept dry. Rings are provided at the top for hanging by. A tie-strap loop is on the back to secure the bag to fence or wall. Dimensions: 50cm deep x 50cm wide (effective). Full-width top opening. This bag is strongly made with reinforced edges all around.

## Hay Rack Folding

203 536 \$79.95

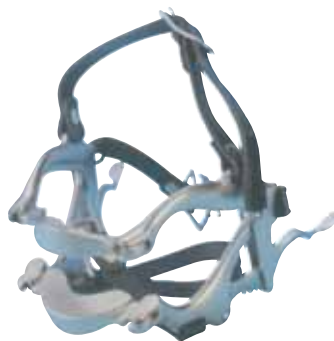

This hay rack is ideal for setting up in temporary pens or paddocks for feeding small amounts of hay, or for taking to shows etc. Easy to transport, set up and take down. Easily stored away when not required. Sides fold in flat. Just hang or tie it on any convenient fence or wall. 60cm square, made out of 6mm steel rod, galvanised finish. Most suitable for smaller livestock.

## Mouth Gag Swales Equivet

204 675 \$259.00

Use of low-cost metal mouth gags can often result in tooth damage to horses. The Equivet mouth wedge will not cause tooth or jaw damage to the horse you are working on, due to the improved and replaceable rubber-block design. Stainless steel shaft.

## Mouth Gag Haussmann

economy	204 659	\$299.00
quality	204 661	\$699.00

The Haussmann design gives maximum security and control to the operator. The ratchets are spring-loaded and easily operated to control mouth opening. The Economy model is of the same good design but is of poorer quality manufacture, and made from cast stainless steel, as compared to high-tensile stainless steel of the Quality model. Thus the Economy model is more susceptible to shock breakages (being dropped, etc). Talk to your veterinarian about professional-quality Haussmann devices available from Shoof.

## Tooth Float Plain Pack

fixed head cpt	206 884	\$34.95
swivel head cpt	206 886	\$39.95
blade only, fixed	206 883	\$10.95
blade only, swivel	206 885	\$10.95

For the simpler equine tooth job our Plain Pack floats are adequate and very well priced. Wood handle. Blades easily replaced. Swivel and fixed head assemblies. Length 55cm o.a.  
 NB: Talk to our veterinarian about higher quality tooth floats in our specialist veterinary range.

## Nose Twitch Equine

204 860 \$39.95

This is a very useful twitch if used correctly, as follows: 1. Hold twitch open, pointing downwards. 2. Reach through the twitch under the rope and grasp the top lip of the horse. 3. Pull the clamp over the held lip and close quickly. Wind the rope around the twitch handles and clip end to halter. The twitch should now be secure on the horse's lip. Length 33cm o.a.

## Stableizer Equine Restraint

small (blue)	212 022	<del>\$139.00</del>	\$99.00
medium (yellow)	212 023	<del>\$139.00</del>	\$99.00
large (red)	212 024	\$139.00	

Invented and developed in USA by Mr. Buck Wheeler, the Stableizer is now used by top trainers and breeders around the world to restrain and calm any horse, in particular for vet or other procedures. Testimonials claim that the Stableizer is better than drugs to calm an animal. Ideal for use during veterinary procedures, breaking in, clipping, blood taking, dental work, scoping, shoeing and loading. Users claim the Stableizer creates an endorphin release, and calms the animal. The Stableizer can be used for short or extended times. Use in place of twitches and lip chains.

## Bot Egg Knife

200 863 \$15.95

Special shaped knife with serrated blade for removal of bot eggs. Composit handle. Length 2mm o.a.

## Gestation Calendar Mare

203 183 \$26.95

Even experienced breeders will find this simple rotating chart handy. Just set the inner disc to breeding date, and all other important dates are indicated. These include: pregnancy verification by ultrasound, oestrus return check, blood stream indicator checks, and of course, expected foaling date. Calendar is 22cm square o.a. Waterproof.
