

## DRUM PUMP....

Invented and developed in New Zealand Ezi-action® drum pumps are sold worldwide, in a great variety of industries due to their chemical resistance, reliability, durability and safety features. The Ezi-action® Drum pumps are offered with a 24 month warranty. A wide range of adaptors ensure these pumps can be used in any commonly available drum or container, metal or plastic, with threaded neck openings in the 55mm to 70mm diameter range. The patented pumping principle of Ezi-action® Drumpumps eliminates wear because there are no critical-fitting parts.

### 25 Litre

25 litre **202 334 \$69.95**  
The 25 pump is suitable for most 20 litre and 25 litre plastic containers. The pump is supplied standard with 'female' cap attachments C55 and C63NZ. Maximum depth neck to bottom: 42cm.

### 60 Litre

60 litre **202 337 \$94.95**  
The 60 pump is suitable for most 60 litre plastic and metal containers. This pump is supplied standard with adaptors MBSP and M63. Maximum depth neck to bottom: 77cm.

**NOT FOR PETROL OR SOLVENTS**  
New Zealand Pump Company Ezi-action® pumps are made from polypropylene and polyethylene, and are suitable for agricultural chemicals, cleaning liquids, acids, alkalis, oil, diesel and lubricants, and liquids with mild solvents in them. The pumps are not suitable for petrol or highly flammable solvents and other liquids. If unsure about the nature of the liquid you intend to pump, contact NZ Pump Company directly on: phone +64/7839-3838, fax +64/7839 1193, email info@nzpump.co.nz

### 110 Litre

110 litre **202 330 \$125.00**  
The 110 pump is suitable for most plastic and metal containers up to 110 litres. The pump is supplied standard with adaptors MBSP and M63. Maximum depth neck to bottom: 84cm.

### 200 Litre

200 litre **202 332 \$155.00**  
The 200 pump is suitable for large drums and barrels, metal and plastic, referred to variously as: 44 gallon, 200 litre, 205 litre, 210 litre. It is supplied standard with adaptors MBSP and M63. Maximum depth neck to bottom: 93cm.

### Powder Measure

500ml **205 209 \$17.95**  
A measuring jug for liquids is standard equipment in any farm dairy, workshop or stores shed. But measuring powdered materials is always more difficult, as they do not always pour easily, or lie level. The new Powder Measure is set to the required amount, then used to scoop up the material. Gentle shaking then lets powder escape down to the pre-set level. Very handy.

### Adaptor

MBSP male BSP	202 346	\$8.95
M55 male 55mm	202 343	\$8.95
M63 male 63mm	202 344	\$8.95
M69 male 69mm	202 345	\$8.95
C55 cap 55mm	202 341	\$8.95
C63INT cap 63mm	202 342	\$8.95

Pump adaptors come in a wide variety of thread types and sizes, allowing connection to almost any drum. Most pumps are supplied with the adaptors most commonly required for the appropriate size pump. Other adaptors, or replacement adaptors, are supplied to order. For 'male' adaptors the dimension is the overall outside diameter of the thread portion of the container bung. For caps ('female') the dimension is the clear internal diameter of the container cap thread.

### Safety Measure

small (25&60L)	202 355	\$22.95
large (110&200L)	202 354	\$22.95

Safety in chemical handling is now a significant issue in all work places. Pumps in chemical drums can be a hazard. The New Zealand Pump Company has developed an answer to this problem. The usual straight spout is simply pulled from the Ezi-action® pump, and the safety measure spout from the Safety Measure Kit is pressed on. The Safety Measure is then clipped onto the spout. This allows the operator to pump an exact quantity of chemical without any chance of chemical contact or spillage. When detached, the Safety Measure's own no-loss safety cap is attached. Unique two-way graduations on the Safety Measure allow measurement whilst actually pouring from the container. It is even supplied with a label ready for writing the chemical name on. Capacity 1 litre.

**24 MONTH GUARANTEE**  
All Ezi-action® drum pumps carry this guarantee. Call New Zealand Pump Company for service (see box this page) or ask for a Service Kit from your dealer.
